

AMENDMENTS TO THE CLAIMS

A presentation of all of the pending claims with their current status indicated follows.

Claims 1-33 (Cancelled).

34. (Currently Amended) A razor, in particular for wet shaving, comprising:
a unitary body having a handle region, a head region and a neck region located
between the handle region and the head region, and
functional components at least partially arranged within the unitary body and
comprise an electrically operated vibration device for producing vibrations in the head region
and an electrical supply device, having an energy store, for the vibration device, the head
region having a holding device for an exchangeable blade element and the vibration device
being arranged in the unitary body in proximity of the holding device; wherein
the vibration device comprises a motor with a flywheel arranged eccentrically in
relation to an axis of rotation; and
the motor and the flywheel are arranged within a protective sleeve, the protective
sleeve being positioned within the head region and extending along the axis of rotation more
than the protective sleeve extends perpendicular to the axis of rotation.

Claim 35. (Cancelled)

36. (Currently Amended) The razor as claimed in claim 35, wherein the vibration device
is arranged in the body in such a way that the vibration of the vibration device during use
produces movement of the head region consequently vibrates substantially radially in relation
to the axis of rotation, cutting edges of shearing blades of the exchangeable blade element,
which runs substantially in a plane defined by the cutting edges.

Claim 41. (Cancelled)

42. (Previously Presented) The razor as claimed in claim 35, wherein the vibration
device is arranged in a recess in the head region, in proximity to the holding device.
